

CANADA HAS 'NO KICK' ON TARIFF

Rumored Protests Denied by Secretary Stimson

Great Britain Also Silent on Subject, He Says

Oil and Ship Men Oppose Duty on Petroleum

WASHINGTON, July 13. (AP)—A denial by Secretary Stimson of published reports that Canada had protested against provisions of the House tariff bill prompted Chairman Borah of the Senate Foreign Relations Committee, to declare today he had "thought all along that these supposed protests from Canada originated in the United States."

The formal Stimson statement had reference to reports that Canadian Minister Massey had made oral representations to the Secretary regarding the proposed duties on shingles, lumber and feeder cattle and rumors that Great Britain had threatened to impose a tariff on American wheat.

The reports pictured the administration as being much concerned over the protests and threats.

DEFIED CATEGORICALLY
"I wish to deny unequivocally," said Mr. Stimson, "any statement made by the Canadian Minister or any representative of the Canadian government to me or to any representative of this government."

"We now learn authoritatively that Canada has made no protest and has no protest," said Mr. Stimson, "and, in fact, expects to make our tariff according to what we deem to be our best interests."

Further tariff activity at the Capitol during the day was devoted to continuation of public hearings on the House bill. Four Senate Finance subcommittee virtually completed hearings on the bill. Only one witness, from Illinois, who could not come here until Monday and some independent oil producers who wish to be heard in behalf of a duty on petroleum in the hydrocarbons remain to be heard.

HEARINGS TO END
Their testimony will be taken next week, when the hearings will be concluded with arguments of approximately twenty-five witnesses on the administrative features of the bill, with principal contests in prospect over the flexible, milling-in-kind and appraisal methods provided for.

H. B. Walker of Baltimore, representing the American Steamship Owners' Association, and Edwin H. Brown of the same city, representing for the American Oil Company, joined today in the protest against a duty on crude oil. Walker contended that a tariff on foreign oil would discourage investment in American oil fields and seriously affect domestic shipping and oil interests.

TARIFFS NOT CORN
Appeals for a duty on topicals as a means of finding further markets for corn products were met with a statement by Arthur L. Strasser of New York that a duty would "not be of the slightest benefit to the farmer" because corn cannot be substituted for linseed.

E. B. Pulka, Louisville, Ky., sought retention of crescent on the free list; John T. Burrows, New York, urged a rate of \$2 a ton on phosphate rock; W. B. Kelly,

JAPANESE TUNE CAUSES GRIEF

But Ambassador Entangles Dilemma by Staying at Home

CAMP RITCHIE (Cascadia, Md.) July 13. (Exclusive)—Governor's Day was anything but a happy occasion for the staff officers at Camp Ritchie, following a report that Jatsui Debuti, Japanese Ambassador, would attend the parade.

They learned that the formalities to be observed in honoring the diplomat included the Japanese national anthem. The camp was searched and finally one copy was found. But it was for voice only, and all the musicians in camp could not write fast enough to figure out the various parts from piccolo to bass drum.

As the situation was darkest, word came from the Ambassador that he would be unable to attend.

Cleveland, asked a duty of \$1 a ton on pepper, and J. B. Shryver, Penn. Glue Company, Landowne, Pa., asked that cassava flour be left on the free list.

UNITED STATES TARIFF BREEDING REPRISAL

(Overnight, 1939, by New York Tribune)

LONDON, July 13. (Exclusive)—No such reparation in Europe has been caused by any American policy in recent years as is now being produced by the new tariff bill, which is regarded on this side of the Atlantic as not protective but designed to prohibit trade between the United States and the rest of the world.

The immediate result has revived discussion for the organization of other great economic units which shall be self-contained and independent as America. The most particular among these is the proposal of Foreign Minister Briand of France for a commonwealth of States of Europe. The second is the proposal by Lord Beaverbrook in England, supported by large numbers of Conservatives and Laborites, for a free trade union of the British Empire with high protective tariffs against outsiders.

UNITED STATES KNOWS STAND, SAYS CANADA

OTTAWA (Ont.) July 13. (AP)—The Department of External Affairs stated here today that the attitude of Canada toward the United States tariff bill has been clearly stated by the Canadian government. It was said, but in the course of conversations which have taken place the position of Canada has been made clear. These conversations have been progressing for some time.

ALTERED CUBAN POLICY CLEARS SUGAR SKIES

NEW YORK, July 13. (AP)—Cuba has "changed its sugar policy" and hereafter will co-operate with the American beet-sugar interests, Col. Jose Miguel Tarafa, special representative of President Machado, announced tonight prior to his return to Havana.

The primary object of his recent mission here, Col. Tarafa said, was to "inform, convince and inspire confidence in the minds of the American beet-sugar interests" for Cuba has definitely altered its governmental policy dealing with the island's most important product.

"So long as Cuba," he said, "shall fail to demonstrate to the American beet-sugar industry by accomplished facts that the Cuban sugar industry is organized as a co-operative entity for the purpose of obtaining and securing the preferential now existing or that which the new American tariff may provide, it will not be possible for the American beet-sugar industry to support a tariff that will provide a sufficient and equitable preferential for Cuba."

"The change in Cuba's sugar policy by President Machado must necessarily inspire the confidence of the American beet-sugar industry and in consequence bring about stability in that industry and that of Cuba."

NEBRASKA TOWN HAS RACE RIOT

Shooting Policeman Causes Mob to Gather

Negro Slayer Kills Self to Escape Flames

All Blacks Driven Out but Police Guard Them

NORTH PLATTE (Neb.) July 13. (AP)—Special police guarded the negro district of this city tonight, while regular forces continued their vigilance against mob formations as the result of the slaying of a policeman today by a negro, whom officers sought to arrest.

All the negroes were ordered to leave town. They began their exit this afternoon, on foot, by horse and buggy, automobile and train. A mob, formed at the house of Louis Seelman, 35 years of age, negro slayer of Policeman Ed Green, retained its formation despite efforts of police to break it up. Threats of violence were heard as members of the mob shouted orders to the negroes to leave town at once.

ARREST ATTEMPTED

The shooting grew out of an attempt by Green to arrest Seelman, who previously had been ordered to leave town in lieu of paying a \$100 fine for beating Ada Miller, a negro woman with whom he lived. He went to Cecilia, but returned this morning, and was arrested by police and Green and another officer went to arrest him.

Green was shot with a sawed-off shotgun as he entered the room. The other officer, Platteburg, was unarmed. He gave an alarm downstairs and stood watching the front of the house. He came and when Seelman refused to come out, a gasoline fire was set around it. Later, Seelman could not be found. Police were discovered under a trap door. Again he refused to come out of the small basement room and gasoline was poured over the trap door. Seelman then shot himself as the negro began to creep about him. He died while being carried out of the house.

MOB FORMS OUTSIDE

North Platte was up in arms. The mob formed outside the house grew with the passing of the hour. Sticks were wielded. Police were ordered to move in extra men and patrolled the negro district, in which lived approximately 200 negroes.

The negroes were guarded by police on their departure. Threats were made against those not fortunate enough to have speedy vehicles.

The Miller woman left by automobile for Council Bluffs, Iowa, police said. Others said they were bound for Kearney, Neb.; Julesburg, Colo.; Denver and Omaha.

Green, who had served on the force for five years, was a popular officer.

OTHERS SUSPECTED
Who aroused the populace was the suspicion that other negroes had aided Seelman in hiding himself under the trap door, leading to the basement of the house. Soon there came shouts, "Catch them all" and "Get them out of town, quick."

The negro colony was told to "clear out" by 3 p.m. The outward trek was orderly, but was accompanied cautiously. Police guarded nearly every road which the negroes took and assigned men to the railroad stations. In some instances police held up and threatened members of the mob to protect the negroes.

All of the colony were given time to get what personal belongings they had. A few carried their houses, but that meant nothing to the mob. The negroes, gathering up what belongings they could carry, walked the railroad tracks, while the more fortunate left in their automobiles and some bought railroad tickets.

Police were assigned to watch the depots and stations through the night and members of the mob were determined to watch the roads and railroads for any returning negroes.

STATE SHERIFF TAKES NO ACTION

LINCOLN (Neb.) July 13. (AP)—No action will be taken in the North Platte race riot, unless there is a call for help. State Sheriff Condit said tonight.

Commenting on the action of North Platte citizens the Sheriff said: "Running the negroes out of town probably is an injustice to many of them who are innocent of wrongdoing, but doubtless they are better off in leaving for the time being."

Gov. Weaver and Lieut. Gov. Williams were out of the city tonight and Atty.-Gen. Sorenson could not be reached.

Corona Woman Killed in Crash

SANTA BARBARA, July 13. (Exclusive)—Mrs. William Carlson of Corona was killed instantly this afternoon when the car she was driving crashed into a cattle truck on the coast highway, north of Taft.

Mrs. Carlson was alone, according to investigating officers, driving south on the highway. The cattle truck belonged to the California Truck Company. So great was the impact that six head of cattle were killed.

VALUABLE CATTLE KILLED BY LIGHTNING

BARABOO (Wis.) July 13. (Exclusive)—Thirteen head of cattle including valuable Holsteins, were killed by lightning on the Glen Kinch farm at Sauk Prairie Saturday. The herd of nineteen were standing in the open pasture when the bolt struck. Six of the animals were stunned.

VOL. XLVIII, NO. 223

KING SCHEDULED FOR OPERATION

Abscess in Chest Will be Drained Tomorrow

Bulletin Says Patient's Health Has Gained

Condition Emphasized as Strictly Localized

LONDON, July 13. (AP)—King George must undergo another operation Monday for the purpose of draining an abscess in the right side of his chest, stated a bulletin issued tonight at Buckingham Palace and signed by six physicians.

His Majesty, who spent part of the afternoon in the grounds of Buckingham Palace, was visited this afternoon by the Prince of Wales. The King only recently was obliged to cancel his usual summer visit to Sandringham on account of the state of his health, after a relapse during his convalescence at Windsor Castle in June.

OFFICIAL BULLETIN

The official bulletin follows: "The general health of His Majesty the King has further improved. The sinus in the right side of his chest has ceased to give adequate exit to, and thereby, the drainage of the small residual abscess with which it communicates."

"It will be necessary therefore for this abscess to be directly drained and treated, and consideration has been given as to the best method of effecting this purpose."

"The necessary operation will take place tomorrow."

(Signed) "H. GRAHAM HODGSON, F.R.C.S., Surgeon."

"R. M. ROSE, F.R.C.S., Surgeon."

"HENRY L. MARTIN, F.R.C.S., Surgeon."

"DAVIDSON OF PENN., Surgeon."

"The King's illness Monday is understood to be a minor one. The natural change of the sinus affected by His Majesty's long illness has not been able to draw away the poisonous matter of the abscess in the right side quickly enough."

TRouble LOCAL

The operation will permit probing of the abscess itself. The X-ray photographs taken at the beginning of the week, immediately after the slaying of the policeman, showed the abscess in the right side of the chest. The results of the examination have brought about the decision to operate again. It was strongly emphasized that the King is quite well generally and that the present trouble is confined strictly to the locality of the right chest.

It was announced at the palace that no further statements concerning the condition of His Majesty will be issued until after the operation Monday.

SEA AIR RACE COMES TO END

(Continued from First Page)

that he could not make New York he decided on the return to the French plane, the Question Mark, is fast and efficient but according to Paris dispatches the plane flown by the Poles carried a hundred more gallons of gasoline than did Coste's plane.

Coste was reported to have dumped out fifty gallons just before taking off from Le Bourget. Under ordinary circumstances this would give the Poles 400 miles greater range than the French flyer.

Weather being favorable, both planes were thought to have sufficient fuel for the trip, about 4100 miles, but a change in winds or a miscalculation in the amount of fuel carried by the Poles might have caused the Question Mark to burn too much of its supply. It is certain that a flyer of Coste's experience would know pretty definitely after he had flown more than 1000 miles what his chances were of reaching his goal.

Until night came the two ships, apparently, were back and neck in their headlong flight. Their wireless signals had been heard by the same ship more than 400 miles off the French coast in the forenoon, and both appeared to be bowling along ahead of a light tail wind at about 100 miles an hour.

SHIPS SEE PLANES
The steamship Chesapeake, 300 miles due north of Cape Finisterre, Spain, reported she has been in direct communication with the Polish plane and that she has heard the French plane wireless the steamship Davenport in the same vicinity during the times she was giving the Polish flyers her position and the weather.

Other ships reported sighting planes after the two ships had left the coast line. The Air Ministry in Paris announced the steamship Ithakas had sighted a "white airplane" early this morning and the steamship Cory radiated that she had sighted a "gray plane" about 250 miles off the French coast. Before heading for the open sea both planes were sighted at numerous points in France and Spain.

FLYERS TURN BACK FOR LE BOURGET FIELD

PARIS, July 14 (Sunday) (AP)—The Air Ministry tonight received a radiogram via Lisbon from the French aviator Coste stating that he is returning to Le Bourget. The message said "returning Le Bourget started back 6:15 p.m." signed "FRANCE." The message was confirmed by the steamship Chesapeake, which sighted Coste at 7 p.m. The message said: "Question Mark sighted at 10:40 in Latitude 42°37' North and Longitude 13°30'." The message did not specify whether the time was morning or evening.

'GIRL' FORTINETEEN YEARS NOW PROVES TO BE BOY

SEKINSBORO (Pa.) July 13. (AP)—Marion Bodmer, 19 years of age, son of Burgess G. A. Bodmer, after masquerading for nineteen years as a girl, donned manly attire and is preparing to enter the legal profession. This was revealed here today when it was learned that young Bodmer has enrolled at an Allenstown preparatory school, a boy's school.

Inquiries as to why a girl was enrolling at a boys' preparatory school brought the admission from the parents that Marion or Marian really is a boy and not a girl.

When Bodmer was born, Mr. and Mrs. Bodmer announced the birth of a daughter and the child was dressed in girl's clothing.

Young Bodmer was graduated from the Sekinsboro High School in 1928 as a girl. He made a good scholarship record and played three years on the girls' basketball team at that school.

The family explained that Marion Bodmer was living in Allenstown and plans to enter the preparatory school, in which he is now enrolled, in the fall. After being graduated from the Allenstown school he plans to study law.

POLES REPORTED SEEKING LANDING FIELD

HORTA (Azores Islands) July 13. (AP)—A radio report to Horta tonight said the Polish aviators urgently wished to land in the Azores. The radio station at Horta, about fifty kilometers distant from Horta, there are no regular airdromes or landing fields on the Azores.

At 11 p.m. the radio station at Horta said the Polish aviators for more than an hour. All preparations were being made, however, for landing the plane on the football field. This is expected to be most difficult as the field is surrounded closely by hills.

PLANES SIGHTED IN EARLY STAGES

PARIS, July 13. (AP)—The Marshal Pilsudski is named by Maj. Ludwik Idzikowski and Maj. Ostajmir Kubala. In the Question Mark are the famous French round-the-world flyers, Capt. Dieudonne Coste and Jacques Bellet.

The Poles were seen away taking off at 4:47 a.m. (10:47 p.m. Friday, eastern standard time.) The lighter and faster Question Mark followed at 5:33 a.m. (11:33 p.m. Friday, eastern standard time.) At 8:30 a.m. what was described as a gray plane, and what was assumed to be the white Marshal Pilsudski, was sighted by the steamship Cory, a British-owned Admiral Shipping Company vessel en route to Brazil. Forty minutes later the

steamer Ithakas reported sighting a west-bound plane from a place eighty miles farther at sea.

Coste took a more southerly route. He made a bee line across France, cut across a corner of the Bay of Biscay and then followed the northern coast of Spain into the Atlantic. He flew low and his overland passage was reported from several points as his red biplane cut through a slightly cloudy sky at the rate of 110 miles an hour. Once at sea, he communicated by wireless with the steamer Esperance Bay, which was off Cape Finisterre, Spain.

RECEPTION PLANS ELABORATED BY REPORTS

NEW YORK, July 13. (AP)—Plans to extend the hand of felicitation to the French and Polish flyers racing across the ocean were interrupted tonight by news that the former had turned back and that their rival were experiencing difficulties near the Azores.

At Roosevelt Field watchers returned, leaving only the customers night crew on duty, and at Mitchell Field the United States Army was making no immediate preparations. Neither field displayed any but the usual lights, although others could be switched on at a moment's notice.

GERMAN MARKS TAKE ON VALUE

(Continued from First Page)

Important from a political than a financial standpoint, but it is considered that the Belgian government has reason to be satisfied with a settlement assuring Belgium a stable budget for the next thirty-seven years and eliminating the irritation of hampering Belgian-German rapprochement.

The Belgian and German representatives also discussed the basis of an understanding for the return of confiscated German property in Belgium which has not yet been liquidated. Definite agreement on this was not reached today.

GENEVA WILL STUDY TREATY

Americans to Lead Kellogg Pact Analysis

Consequences of Violation to be Determined

International Law Codes Also on Program

WASHINGTON, July 13. (AP)—The implications of the Kellogg-Brand peace pact are to be analyzed in a study to be led by the American group of the interparliamentary union council at Geneva in August.

The study will be directed toward determining the consequences of a violation of the pact and the responsibilities of the States in this respect.

Other subjects to be studied include the drafting of a general plan for codification of international law, the development of international judicial organizations and the reduction of armaments.

The American group is headed by Senator Burton of Ohio, who made public today through Dr. Arthur D. Hall, executive secretary, the official list of the members. It includes Senators Ashurst of Arizona, Tydings of Maryland, Connally of Texas, and Thomas of Oklahoma; Representatives Lindbergh of Maryland, Chittenden of Illinois, Korell of Oregon, Fitzgerald of Ohio, McFarland of South Carolina, Bloom of New York, Purcell of Indiana, Monahan of Virginia, Morion D. Hull and Britten, both of Illinois, Porter of Pennsylvania, Johnson of Oklahoma, Wiggleworth and Andrews, both of Massachusetts, and former Representative Bartholdis of Missouri, author of the model arbitration treaty being considered by the union.

Most of the group plan to sail on the Leviathan the 27th inst. Representative Montague, vice-president of the group, or Representative Morton D. Hull probably will head the study on the Kellogg pact. Chairman Britten of the House Naval Committee, plans to confer informally during the meeting with the British delegates on the feasibility of bringing about a naval armaments conference between the two governments.

SENTENCE UPHOLD

PHOENIX, July 13. (AP)—The Arizona Supreme Court today sustained the judgment of the Gila county Superior Court in sentencing Calph Harrison Brandy to serve a term of twenty to twenty-five years in the State prison when he was convicted several months ago of holding up a gambling game near Rice.

FULL-VISION, SUPER-AUTOMATIC STATION SELECTOR: ALL STATIONS PLAINLY AND PERMANENTLY VISIBLE... JUST SLIDE THE KNOB TO RIGHT OR LEFT—AND IN COMES THE STATION YOU WANT!

The dream of radio engineers... the hope of millions of music-lovers... now at last realized!

Victor has solved for all time—the greatest problem in radio.

Here for the first time is the instrument which the greatest radio and acoustical minds have set as their goal—ever since the invention of the radio.

...an instrument that introduces the greatest achievement in radio performance—a triumph that puts the industry years ahead! ... a radio so utterly new in design... so radically new in principle... so astoundingly new in performance that no other instrument can compare with it.

... a radio that Victor has withheld from the world for years... until the last detail was tried and approved—and tested under every conceivable condition in every section of the country.

... a radio which, for the first time, produces *acoustic symmetry*—the perfection of tone fidelity... at every point on the scale! Incredibly realistic... high notes and low notes at last in their proper proportions... bass? ... deep and realistic! ... higher notes? ... brilliant and expressive! ... even the "s" sounds are now perfectly intoned!

A radio that introduces for the first time an amazing new simplified, full-vision station selector—super-automatic.

A radio that employs two of the new-type RCA Radiotrons 245 which the whole world is talking about!

Victor's own exclusive radio... built in to a console cabinet of exquisite Victor workmanship... a radio you will be proud to own!

Here's the best news of all... Victor-Radio can also be had with the marvelous

new improved Victor Electrola—combined in one handsome compact cabinet... both attuned to the same electro-dynamic reproducer. Now—for the first time, tone quality from radio to match the marvelous new Orthophonic Records!

The prices are amazing! Only \$155 list for the Victor-Radio Console... only \$275 list for the Victor-Radio-Electrola. No musical instruments in the world offer you so much—at any price! Only Victor's great resources and manufacturing skill make these astounding values possible! Victor Talking Machine Division—Radio-Victor Corporation of America, Camden, N. J., U. S. A.

Tomorrow! Set aside fifteen minutes for the musical thrill of your life. Go to your nearest Victor Dealer... see and hear Victor's greatest contribution to musical America. It will be an experience you'll never forget. Tomorrow—don't miss it!

Outstanding Victor Features

- 1 **Micro-synchronous balance:** Every element in micro-exact resonance at any frequency. Condensers automatically harmonized. Unprecedented sensitivity and selectivity. Perfect performance through the entire range of the dial.
- 2 **Super-automatic, full-vision, illuminated station selector...** brings in station at a touch. The station you want is always in plain sight.
- 3 **Improved circuit developed by Victor...** unparalleled stability and fidelity.
- 4 **Push-pull amplification...** introducing the new RCA power Radiotron 245. Utilizes two. Greater and undistorted volume throughout the entire musical scale.
- 5 **Three separate and distinct units...** changeable... all accessible... all protected with scientific thoroughness.
- 6 **Marvelous new improvement in the Victor electro-dynamic reproducer...** reproduces the quality of voice or instrument in all its color, all its lifelike realism.
- 7 **Compact cabinet design of all-Victor workmanship...** exquisite in every line. Harmonizes with the furnishings in the finest homes.
- 8 **A remarkable new improved Electrola...** that reproduces the new Orthophonic Records in all their brilliancy. Even your old records reveal startling new beauty.

ARIZONA PLANS RIVER STRATEGY

That State and California
Still "Pretty Far Apart"

Commissioners Hold Session
to Map Out Procedure

Informal Meetings Planned
to Discuss Differences

PHOENIX, July 13. (AP)—Arizona
and California still are "pretty far
apart" in the Colorado River con-
troversy.

That was the official statement
given out today at the close of an
informal conference of members of
the Arizona Colorado River Com-
mission with Gov. Phillips and John
P. Gray of Coeur d'Alene, Idaho,
who is a special assistant to Atty-
Gen. Peterson in matters pertain-
ing to the river.

BOARD OF STRATEGY

The conference was in the nature
of a board of strategy meeting at
which legal points were gone over
in case Arizona might find it neces-
sary to bring suit in order to pro-
tect her rights. While the wide
divergence of views existing be-
tween Arizona and California was
not minimized, a spokesman for the
Arizona commission said today that
the "hopeful attitude" entertained
by the commissioners of the two
states at the close of the Washing-
ton conference remains unchanged.

Nothing has happened since the
Washington conference to alter the
situation. Informal meetings, it is
said, may be held between the Ar-
izona and the California commis-

PREACHER'S HIGH IDEALS CLASH WITH DITTO SKIRTS

TRENTON (N. J.) July 13. (Ex-
clusive)—Rev. Clyde E. Richebaugh,
former pastor of the Suburban
Christ Presbyterian Church near
Trenton, is said to be a young man
of ideas about the length of Sunday
go-to-meeting skirts. He has been
relieved of his temporary pastorate
by the New Jersey Presbyterian
synod.

Whether his ideas on skirts had
anything to do with his removal
has not been definitely learned, but
here and there at sewing circles and
missionary meetings mainly mem-
bers of the congregation infer they
had. Their gossiping has to do with
letters in which Mr. Richebaugh
urged certain mothers of certain
daughters in his flock to see to it
that their daughters' Sunday out-
fits had longer skirts.

Just before the conference sched-
uled to be held at Santa Fe, N. M.,
October 14.

MEETING TUESDAY

The next regular meeting of the
Colorado River Commission of Ar-
izona will be held here Tuesday.
The principal point in con-
troversy between Arizona and Califor-
nia is the inclusion of the waters
of the Gila River and its tributaries
in the "computation" of the waters
to be divided between the two
states. Arizona contends that the
Gila waters should not be included
in the "pool," while California
argues that an equivalent of the
Gila flow should be included.

CHERRY FITS KILL GIRL

MONTAUBAN (France) July 13.
(AP)—When Miss Jeanne Galtie, 16
years of age, became ill after eat-
ing cherries, a doctor was called and
ordered an operation. The girl died
during the operation and surgeons
found 800 cherry stones in her
stomach.

Rev. George H. Ingraham, execu-
tive secretary of the synod, today
professed to know nothing of the
skirt controversy.

"Oh, yes," he conceded, "Mr.
Richebaugh has been dismissed. But
skirts—oh, no, I don't know about
any skirts. Mr. Richebaugh pos-
sesses very high ideals, although he
has been indiscreet."

Just what the cryptic reference
to indiscretion might cover, Mr.
Ingraham declined to specify.
The youthful deposed minister
could not be located today to af-
firm or deny his reputed sensitiv-
ness to evidenced girlish knees or
the complaint that he had refused
to collect contributions from outside
the church and had banned church

Alien Defeats Move to Deport

NEW YORK, July 13. (AP)—Fed-
eral Judge Thatcher, in granting a
writ of habeas corpus for John
Vojch of Glens, Ariz., ruled today
that Vojch could not be deported
from the United States for be-
longing to the Workers' party be-
cause that party, as a political or-
ganization, participated in the last
national election.

Vojch, a native of Jugo-Slavia,
came to the United States in 1921
and has been living in Arizona since
1926. He has been at Ellis Island
for a week facing deportation be-
cause of his affiliation with the
Workers' party.

Court action in Vojch's behalf
was brought by the International
Labor Defense.

ADWAY

YES, HE HAD BANANAS— ALSO MUCH JAMAICA RUM

NEW YORK, July 13. (Exclusive)—They arrested Joseph Martini on Pier 27, East River, today, but not until he had come close to establishing himself as a genius. He came within twenty bottles of rum of successfully disguising himself as a bunch of bananas!

With the bribe of the tropic cabed on her hull, and her hold loaded with bananas, the steamer St. Mary of the Atlantic Navigation Company, docked at Pier 27. The donkey engines started grunting, and the yellow digestion fighters in great clusters began to swing to the dock in slinging loads.

Agent Edward Siebers and Frank Jensen of the Customs Service were hiding behind pillars, watching every banana with great fidelity to

growers of Florida and West Texas, whose agitation for protective duties the vegetable men of this section ascribe their present dolorous outlook.

INDUSTRY GROWS FAST

The winter vegetable industry has grown up here only since 1907. It was nursed in infancy by the Wells Fargo Express company and has, throughout its life, been in American hands. It has grown steadily until the last season saw 4307 carloads of tomatoes, nearly 1900 of peas and 278 of peppers cross the northern border.

While a total of more than 4000 carloads of Mexican tomatoes bulk

large to the lay mind, the West Coast Vegetable Association of Nogales, Ariz., contends that this is less than 5 per cent of the total American consumption. They also argue that whereas the banner crop of 1927 gave the American public 100,000,000 pounds of tomatoes in the five winter and early spring months, this represented only three and a third tomatoes per capita, or about two-thirds of a tomato a month.

COSTS COMPARED

It is also argued that the Mexican production cost is higher than that of either Texas or Florida and that this, added to higher freight payments and the former tariff charge of 15 cents a lug, made the cost of laying down Mexican tomatoes in New York 28.3 per cent more than the Florida and Texas products. It is asserted that proposed duty of 8 cents a pound would give American growers an advantage of 58 per cent in the Chicago market and of 88 per cent in New York, with proportionate figures for Portland, Me.; Boston, Mass.; Seattle, Wash.; San Francisco and other centers now reached by the Mexican-grown product.

So the Mexican growers are looking to the Senate to save them from ruin. They consider their industry as American from start to finish. American capital fostered it, American traction prepared the ground for American seeds and American trucks carry the crop to the packing houses. There the tomatoes are wrapped in American paper, packed in American boxes, loaded into American refrigerator cars and rolled over American railroads to markets where tribute is paid to American commission houses before the luscious fruit reaches American dinner and luncheon tables.

WILSONS AT BEDSIDE OF DAUGHTER

Mother Weeps But Victim of Auto Crash Brightens on Parents' Arrival

CHICAGO, July 13. (Exclusive)—Mr. and Mrs. Milton Wilson today completed their trying journey from Santa Barbara, Cal., and hurried to the bedside in Evanston Hospital of their daughter, Dorothy, 35-year-old debutante, who was seriously injured when her automobile was run over by one driven by Miss Helen Hertz, 14, daughter of the former head of the Yellow Cab Company.

Mrs. Wilson wept as she knelt beside her daughter, who, although physicians say may be crippled for life, but the girl was cheered visibly by the presence of her parents and there is much greater hope now for her recovery.

The Wilsons were driven to the hospital from the Loop by the chauffeur for John Stuart, president of the Quaker Oats Company and cousin of Mr. Wilson. The chauffeur took them past the scene of the accident at Jackson avenue and Davis street and Mrs. Wilson, remarked about the clarity of vision for a driver approaching the intersection.

Liquor Scandal Suspect Taken

SAN FRANCISCO, June 13. (Exclusive)—George Censer, said to be one of the principals in a Los Angeles liquor scandal disclosed last winter which involved police officers and deputy sheriffs, was arrested here today by Los Angeles officers at 1418 Turk street, on charges of conspiracy to violate the Wright Act.

Censer, for whom the police have searched three months, was found ill in bed. He was placed under guard and will be taken to Los Angeles when well enough to travel.

The Los Angeles officers said four other men are sought in connection with the Los Angeles case.

Belgian Named Chamber Head

AMSTERDAM (Holland) July 13. (P)—Former Premier Theunis of Belgium was elected president of the International Chamber of Commerce at the chamber's final session today.

Its next meeting place will be selected by the executive council in September.

METER SYSTEM APPROVED

SAN FRANCISCO, July 13. (Exclusive)—Compton Investment Company has been authorized to operate a public utility water system in tract No. 7874, Los Angeles county, abutting monthly meter, rate of \$1.50 for the first 1000 cubic feet or less and 10 cents per each 100 cubic feet above the base consumption.

HUNDREDS LOSE LIVES IN FLOOD

Persian Towns Wiped Out by Cloudburst

TEHRAN (Persia) July 13. (P)—At least 275 persons were killed and several villages wiped out in floods at Tabriz on Thursday understood to have been caused by a cloudburst.

Because of the number of bodies recovered there were fears that the loss of life might be greater.

Roads were destroyed and it was stated that 2000 houses collapsed, with others still falling. Crops also were seriously damaged.

Tabriz, next to Teheran, is the largest city in Persia and has a population of about 180,000.

Armed Guards Watching Home of Henderson

LONDON, July 13. (P)—Heavily armed guards have been placed around the residence of Arthur Henderson, British Foreign Minister in the new Labor government, after what police consider probable attempts to do him harm.

A man came yesterday to the secretary's flat and demanded to see him. When he was asked to leave and did depart he produced a pistol and shouted: "I'll get him yet."

Shortly afterward two well-dressed men called to see Mr. Henderson. They also were asked to leave and uttered threats against him as they departed. Police are alert as to their identity.

JAIL ASKED FOR YOUNG STINNES

Prosecutor Demands Prison for Plutocrat's Son

BERLIN, July 13. (P)—The State's Attorney, summing up the case against Hugo Stinnes, Jr., today asked eight months' imprisonment plus a fine of 100,000 marks (about \$25,000) for the son of the late German magnate, on charges of defrauding the German government by financial operations during the inflation period.

PUBLISHER DIES

BURLINGTON (Vt.) July 13. (P)—Willard B. Howe, 65 years of age, publisher and general manager of the Burlington Free Press and president of the Vermont Press Association, died here today.

REPORT SCORES
TRASH DUMPERSUntidy Americans Flayed
for Tin-Can TrailsRubbish in Forests and Seas
Held MenaceMaine Graveyards Pointed
Out in Report

NEW YORK, July 13. (AP)—Careless Americans, who strew their parks with newspapers, leave trails of tin cans along their scenic highways, and drop lighted cigarette stubs in their forests, are by their untidy habits also ruining their harbors and rivers for navigation, E. M. Lapham, vice-president of the Waterway League of America, said today.

Rows and rows of abandoned tin-can picturesque marinas gravely endanger the navigation of the Hudson River—and the public practice of throwing all kinds of refuse into the water, he declared, are clogging up the river and rendering some of the most important and finest natural harbors in the world unsafe.

NEW YORK HARBOR
Conditions have become so bad in New York Harbor that shippers lose many thousands of dollars every year through damage to their boats, Mr. Lapham asserts in a written report made public today.

The report was made by Mr. Lapham, as chairman of a committee on tidals to navigation, to Otto E. Schmidt, president of the Waterway League.

"Conditions are perhaps worse here because this is one of the oldest of our harbors," Mr. Lapham said. "But I have been told that other harbors, along both the Atlantic and the Pacific, are having their troubles, too."

"We found that the waters are filled with a floating menace," he said. "Thousands and thousands of water-logged tin cans drifting about, clogging up the river and rendering some of the most important and finest natural harbors in the world unsafe."

BOAT GRAVEYARDS
The "boat graveyards" at New Haven, N. J., and in the Hudson River near West Point, constitute

JESSE JAMES, JR., TAKES
APPLY TO BANDIT ROLE

JOSEPHITE, July 13. (Exclusive)—The old saying "Like father, like son" applies to bears as well as humans. This assertion was advanced here today by members of the juvenile squad of the Ranger department investigating the daring robbery late yesterday of a stage on the Glacier Point Road by a very small cub, "Jesse James Jr.," son of "Jesse James," notorious past hold-up bear, is suspected of having stopped the stage. The baby bandit escaped with a sweet loot valued at \$7 cents.

According to the driver, who lost two sticks of gum, "Jesse James, Jr.," emerged from a clump of pine and stood up on his hind legs in

one of the gravest menaces to shipping around New York, the report states.

Mr. Lapham said officers of the Army and Navy had co-operated with his committee in making its investigation.

Pair Arraigned
in Pay-Roll Theft

TOPEKA (Kan.) July 13. (AP)—Mrs. Vivian Scaper, 35 years of age, and Cecil Streit, 34, were arraigned today on a highway robbery charge in connection with the \$14,000 payroll robbery June 28, last, of W. L. Salmons, chief clerk for the Security Benefit Association here.

Mrs. Scaper waived a preliminary hearing and was bound over to the District Court. Streit entered a plea of not guilty to the charge and his preliminary hearing was set for Tuesday. Both were remanded to the County Jail in default of \$5000 bond each.

London's Poor
Fed by Ducks

LONDON, July 13. (AP)—Elfish, the Biblical prophet who was fed by the ravens, has his modern London counterparts in the homeless and penniless wanderers who sleep on the Thames embankments. They are fed by the ducks.

Now and then one of them will make a quick dash to the water's edge and clamor back a moment later with a new-laid duck egg—his breakfast.

LITHUANIA HAS
FIERY PREMIERVoldemaras Tiny in Stature
but FearlessHe Has Will of Iron and
Unlimited NerveAttempts on His Life Fail
to Affect Him

KAUNAS, July 13. (AP)—No one who has met Augustinas Voldemaras once fails to come away without receiving a definite and lasting impression.

Not that he has a handsome figure or an engaging countenance. The fiery little Premier, Foreign Minister and virtual dictator of Lithuania stands less than five feet in his socks, but he has the jaw of a prizefighter, which snaps comically when he talks about Poland and the Viuna region, which the Poles took away from Lithuania back in 1920.

A few minutes convince the visitor that Augustinas Voldemaras is no mediocrity. His logic is sharp as a razor, and he has a will of iron, as many a man who tried conclusions with him has found out to his cost. Many of them are not alive to tell the tale. "He's just the hard-skulled, stiff-necked kind they raise hereabouts," an Associated Press correspondent was told in Kaunas, the Lithuanian capital.

HARD NUT TO CRACK
Stubborn he certainly is, as many who attempt to negotiate with him can testify. Not an inch will he yield, not even to the scaled Council of the League of Nations.

SENATORS INSPECTING
INDIAN RESERVATIONS

WASHINGTON (S. D.) July 13. (AP)—Senators Wheeler of Montana and Prader of North Dakota, members of the Senate Indian Affairs Committee, who are making an inspection tour of western reservations, today began their work in South Dakota. They were joined here by Senator McClellan of South Dakota, and left this morning for the Greenwood agency near Wagner.

Next week they will visit the Pine Ridge and Rosebud agencies. The Senators came here from Sioux City last night, after completing a survey of the Indian situation at Winnebago, Neb.

Neither could the stern-visaged Sir Austen Chamberlain get the better of him with the diplomatic manner, nor could his formidable adversary, Marshal Joseph Pilsudski, achieve anything by bluster, when he faced the aquiline-built "little professor" with his wiry shock of dark hair.

Lithuanian, Polish, Russian, German, French, English, Italian, Lithuanian, who has just turned 48, is an early riser, and a glutton for work. When necessary, he goes without sleep. Like most men above the average caliber, he inspires the most loyal devotion or the most intense hatred. His wife, a Frenchwoman from Bordeaux, watches over him with unceasing care. She accompanies him everywhere. They have no children, but their married life is one of complete harmony.

HAIRY SIMPLE
Voldemaras's habits are simple. He is no abstainer, but extremely moderate in his consumption of alcoholic liquors. For exercise, he walks whenever he can. His early connection with journalism—he wrote for Lithuanian papers when the Lithuanian language began to emerge from decades of czarist suppression—he still keeps up. He also remains on the roster of Kaunas University as professor of history. His doctorate he gained at the German University of Konigsberg.

No one can tell what the future holds in store for him. Both Germany and Soviet Russia, with a strong Lithuania as a set-off to a too powerful Poland, whereas the chief concern of France and Great Britain is that Lithuania shall not drop out of the block of border states erected to keep Bolshevism out of Western Europe.

Voldemaras knows all the tricks of the diplomatic trade, and he just sits tight. Whatever happens, the "little professor" may be depended upon to give a good account of himself. His undoubted patriotism assumes him a place in the annals of his country, although some of his methods may be open to challenge.

FILIPINO TWINS
Finally Marry
Chosen Sisters

MANTILA, July 13. (AP)—The Filipino "Siamese twins," Lucio and Simplicio Godino, were married today to Natividad and Victorina Mateo, sisters. The ceremony, which took place at a Catholic church, was followed by a wedding feast at the home of Theodore Yanga, guardian of the 31-year-old twins.

The marriage was despite the opposition of a license clerk, who argued that the twins were "one individual with a dual personality and that their marriage would result in that one individual having two wives. The Philippine Department of Justice ordered that a license be granted.

ARMY HELD NO
Substitute for
Penitentiary

SAN FRANCISCO, July 13. (Exclusive)—The United States Army is not an alternative for criminal corrective institutions and must not be considered as such, Maj.-Gen. Hines, commanding the Ninth Corps Area, asserted.

His statement was in the form of a letter to a judge in San Luis Obispo, deploring the jurist's action, as reported in dispatches, of offering a thief suspension of sentence if he would join the Army.

"It is well known and already aware of the fact, the United States Army is not and should not be regarded as a substitute for a penal institution," Gen. Hines wrote. "Men of the service are entitled to 'justifiable indignation' if the action was correctly reported, he added.

AUTO ACCIDENT
Kills Seaman

VALLEJO (Cal.) July 13. (AP)—A. J. Taylor, seaman attached to the submarine S-48, now at Mare Island Navy Yard, died at the Navy Hospital today of injuries received in an automobile accident near here Thursday night. He was born in Goodwill, W. Va.

Carl M. Ramsey, a machinist's mate, with Taylor at the time of the accident, was killed when the car overturned.

ALTRURIANS ELECT
OREGONIAN AS CHIEF

PORTLAND (Or.) July 13. (AP)—Herbert R. Risley, Portland, was elected president of Altrurians International. Other officers are Lance Richardson, San Francisco, first vice-president; John Sexton, Oakland, second vice-president. The directors are Ralph Wilder, Sacramento, Edward Henderson, and Richard Sanders, Los Angeles, and Lem Barker, Fresno.

HUGE BLACKSNAKE
NURSED BY COWBovine Makes no Objection to
Blacksnake Taking Place
of CalfCOLUMBUS (Ind.) July 13.
(Exclusive)—Hattie Olmstead's best cow wouldn't give milk although she apparently wasn't dry. He secretly watched her half a day, and finally saw a large blacksnake wrap itself about her hind leg and proceed to suck her lunch.

The cow didn't object.

Swedish or Czech—it's all the same to the Baltic Mussolini, who met and defeat any argument in any of these languages.

ENEMIES NUMEROUS
But Voldemaras is not only a man of words. He knows how to strike quickly and hard. He is said to be the strongest-armed professor in Europe. He has need to be, for his enemies are many, and they lurk in dark corners.

Only recently he was shot at on his way to the Kaunas Opera House. One of his adjutants was killed, and his young nephew and another officer were wounded. A bullet passed through his wife's coat. But even then his iron nerves were unshaken. He spent the night at his nephew's bedside and went to work the next morning at the Foreign Office as though nothing had happened.

Voldemaras, who has just turned 48, is an early riser, and a glutton for work. When necessary, he goes without sleep. Like most men above the average caliber, he inspires the most loyal devotion or the most intense hatred. His wife, a Frenchwoman from Bordeaux, watches over him with unceasing care. She accompanies him everywhere. They have no children, but their married life is one of complete harmony.

HAIRY SIMPLE
Voldemaras's habits are simple. He is no abstainer, but extremely moderate in his consumption of alcoholic liquors. For exercise, he walks whenever he can. His early connection with journalism—he wrote for Lithuanian papers when the Lithuanian language began to emerge from decades of czarist suppression—he still keeps up. He also remains on the roster of Kaunas University as professor of history. His doctorate he gained at the German University of Konigsberg.

No one can tell what the future holds in store for him. Both Germany and Soviet Russia, with a strong Lithuania as a set-off to a too powerful Poland, whereas the chief concern of France and Great Britain is that Lithuania shall not drop out of the block of border states erected to keep Bolshevism out of Western Europe.

Voldemaras knows all the tricks of the diplomatic trade, and he just sits tight. Whatever happens, the "little professor" may be depended upon to give a good account of himself. His undoubted patriotism assumes him a place in the annals of his country, although some of his methods may be open to challenge.

FILIPINO TWINS
Finally Marry
Chosen Sisters

MANTILA, July 13. (AP)—The Filipino "Siamese twins," Lucio and Simplicio Godino, were married today to Natividad and Victorina Mateo, sisters. The ceremony, which took place at a Catholic church, was followed by a wedding feast at the home of Theodore Yanga, guardian of the 31-year-old twins.

The marriage was despite the opposition of a license clerk, who argued that the twins were "one individual with a dual personality and that their marriage would result in that one individual having two wives. The Philippine Department of Justice ordered that a license be granted.

ARMY HELD NO
Substitute for
Penitentiary

SAN FRANCISCO, July 13. (Exclusive)—The United States Army is not an alternative for criminal corrective institutions and must not be considered as such, Maj.-Gen. Hines, commanding the Ninth Corps Area, asserted.

His statement was in the form of a letter to a judge in San Luis Obispo, deploring the jurist's action, as reported in dispatches, of offering a thief suspension of sentence if he would join the Army.

"It is well known and already aware of the fact, the United States Army is not and should not be regarded as a substitute for a penal institution," Gen. Hines wrote. "Men of the service are entitled to 'justifiable indignation' if the action was correctly reported, he added.

AUTO ACCIDENT
Kills Seaman

VALLEJO (Cal.) July 13. (AP)—A. J. Taylor, seaman attached to the submarine S-48, now at Mare Island Navy Yard, died at the Navy Hospital today of injuries received in an automobile accident near here Thursday night. He was born in Goodwill, W. Va.

Carl M. Ramsey, a machinist's mate, with Taylor at the time of the accident, was killed when the car overturned.

ALTRURIANS ELECT
OREGONIAN AS CHIEF

PORTLAND (Or.) July 13. (AP)—Herbert R. Risley, Portland, was elected president of Altrurians International. Other officers are Lance Richardson, San Francisco, first vice-president; John Sexton, Oakland, second vice-president. The directors are Ralph Wilder, Sacramento, Edward Henderson, and Richard Sanders, Los Angeles, and Lem Barker, Fresno.

Another Record
over
800,000
New CHEVROLET Six
on the road since Jan. 1st

Today's Chevrolet is scoring a huge nationwide success because it represents one of the most sensational achievements in automotive history—a Six in the price range of the four.

Until you actually drive this remarkable car, you cannot appreciate how smooth, quiet and comfortable a low-priced automobile can be. Due to superior inherent balance, the Chevrolet six-cylinder engine delivers its power freely and easily throughout the entire speed range—delightfully free from annoying vibration and rumble. Combined with this remarkable six-cylinder smoothness are equally remarkable speed, power and acceleration—and an economy of better than twenty miles to the gallon.

In addition to such outstanding performance, the Chevrolet Six offers the outstanding advantages of Bodies by Fisher in a variety of sparkling color combinations at no extra cost. And no car ever provided a more impressive array of modern convenience features—adjustable driver's seat and VV one-piece windshield in closed models, easy action clutch and gear-shift, ball bearing steering, and instrument panel complete even to theft-proof Electrolock and electric temperature indicator! Come in! Learn by comparison and a ride why hundreds of thousands of careful buyers have already chosen the Chevrolet Six.

WORLD TRADE
RALLY CLOSES

International Chamber Ends
Amsterdam Congress

Indorsement of Young Plan
Among Resolutions

American Delegates Score
in Tariff Action

AMSTERDAM (Holland) July 13. (AP)—World leaders in trade, finance and industry, who have been attending the congress of the International Chamber of Commerce here, brought their six-day session to a close today after adopting no fewer than forty-one resolutions. These deal with a broad variety of subjects, including indorsement of the Young plan, other subjects include the economic reconstruction of China and world peace through reform of the calendar, unfair commercial practices, bribery and forgery.

The 120 American delegates won a signal victory at the congress by preventing any discussion in plenary session of proposed increases in American import duties, although that subject is profoundly agitating all of Europe.

TARIFF AIMS TOLD
By clever maneuvers behind the scenes, the Americans were able to prevent discussion of the proposed new duties which would act as a boomerang when the American Congress actually voted on the schedule.

The American delegates also were able to convince the Chinese, who attended such an international trade gathering for the first time, that neither the United States nor Europe has any intention of forcing an installment plan of payment on China, despite the fact that foreign loans to that country have not been met.

CHINESE BENEFIT
Although the Chinese themselves were disappointed in not getting from the present gathering any extension in favor of abolition or alteration of the present extraterritorial rights enjoyed by foreign nationals in China, they admitted they have learned much from the contacts with European and American business leaders. They also felt that by their joining of the inter-

**Was On Verge
Of Breakdown
Says L. A. Man**

"You can talk about your medicine all you want to, but Sargon proved his merit to me. It's the best treatment I ever took in my life!"

O. F. BAGWELL

"I was in a bad way with stomach trouble and just about on the point of a physical breakdown. As I ate and as I do justice to a hearty meal, I had indigestion almost continually. The way gas would turn on my stomach and almost smother me with a bloated feeling, was something awful. My nerves were shot to pieces and many a night I'd toss and turn in bed for hours before I could go to sleep. I got up feeling tired and would be all fagged out before I got half started working a day's work. Constipation had always bothered me and nothing I took ever gave me permanent relief. I was about ready to give up, but when I kept reading the straightforward statements of outstanding men and women of Los Angeles, endorsing this new Sargon medicine, it was convincing enough evidence for me, so I started the treatment.

"My only regret now is that I didn't begin taking Sargon sooner. Six bottles of this wonderful medicine have made me feel like a new man! My whole system seems toned up and I've got more strength and vigor than I've had in five years. That old stomach trouble is gone and I can do justice to a hearty meal. What a relief it is to be nervous, but sleep good all night and get up feeling great, ready to be on the go. I can stay on the job all day and never get tired like I used to.

"Sargon Bow Men Pills are the only thing I ever found that completely rid me of constipation. I always recommend them with the best of feeling.

"You can just count me in on the thousands of others Sargon has restored to splendid health. There's nothing to equal it as a strengthening, reconstructive medicine and the sooner everybody realizes that, the less suffering there will be."

The above convincing statement was made recently by O. F. Bagwell, 1418 Magnolia avenue.

A special Sargon representative is explaining the merit of this new medicine to hundreds of people daily at the Owl Drug Store, 4th and Broadway. Sargon may also be obtained at all Owl Drug Stores in Los Angeles and other cities. (Advertisement.)

FIVE CRIPPLES ENGAGE
IN RIOT AT HOSPITAL

PRESCOTT (Ariz.) July 13. (AP)—Five patients of the Yavapai County Hospital, each more than 60 years of age and crippled with rheumatism, today indulged in a riot which had been brewing for more than a week.

When it was over and the authorities were in control of the situation, Bill Kelly, known as "Jumbo," the hospital cook, had a deep cut across his head, and three of the assested rioters were in the national chambers of commerce, they have brought the East and West appreciably closer commercially.

Among the other interesting resolutions passed by the congress was one urging the adoption of a perpetually unchangeable calendar with fixed dates for Easter. The business men asked the League of Nations to call an international conference on this question to be made up of business, scientific and theological experts.

EXEMPTION URGED
Another resolution declared that foreign motorists should be exempt from taxation for at least two months after their arrival in a country. The establishment of free airports at all principal international trade centers was urged, and with this declaration went an opinion that air travel should be free from all taxes for at least two months after the arrival of passengers and goods in air transports should be accelerated; furthermore that goods loaded and unloaded at transport of free airports should be exempt from duty.

Former Premier Theunis of Belgium was elected president of the International Chamber of Commerce at the chamber's final session today.

Its next meeting place will be selected by the executive council in September.

ULTIMATUM
SENT TO CHINA

(Continued from First Page)

Armed resistance by soviet Russia against aggression was demanded at its numerous meetings and demonstrations at Nijni Novgorod, Kuzn, China and Voronezh, as well as other cities throughout the soviet union.

At Kuzn thousands of demonstrators passed a resolution stating that the soviet government should conduct in favor of abolition or alteration of the present extraterritorial rights enjoyed by foreign nationals in China, they admitted they have learned much from the contacts with European and American business leaders. They also felt that by their joining of the inter-

MOSCOW COMMENT
Moscow generally learned of the events in Manchuria for the first time today through Tass Agency reports, which said in part:

"Simultaneously with news of seizure of the management of the Chinese Eastern Railway came the report of concentration along soviet frontiers of Manchurian troops fully armed and on war footing, which had moved to the very frontier.

"According to the same reports, Russian White Guard detachments which the Manchurian command intend to send forth on Russian territory were lined up with Manchurian troops facing the frontier.

**MUKDEN DISPATCHES SAY
CLASH APPEARS Averted**

TOKYO, July 13. (AP)—Mukden dispatches to the Japanese news service Rengo state that although Chinese of Manchurian troops hostilely appears over Chang Hsueh-Liang, Governor of Manchuria, is reported to have ordered large quantities of arms and ammunition shipped to Harbin and five brigades to move to the border.

Harbin advises say that the Japanese Consul-General, representing the committee of Chinese and Chinese-Hui, Governor of the Harbin district, and is understood to have expressed a desire for a peaceful solution of the difficulties over the Chinese Eastern Railway.

Rengo dispatches from Harbin stating that L. D. Serbsky, a Russian agent, is a member of the Harbin district, and is understood to have expressed a desire for a peaceful solution of the difficulties over the Chinese Eastern Railway.

It is considered doubtful, however, that the Harbin authorities will consent to negotiate the Chinese Eastern Railway question, and probable, therefore, the plenipotentiary will have to proceed to Nanking to confer with Dr. C. T. Wang, Chinese Foreign Minister.

**Flames Raze
Paper Plant
in Dominion**

NEW WESTMINSTER (B. C.) July 13. (AP)—Causing a loss of \$1,200,000, fire late today destroyed the plant of the Westminster Paper Mills, Ltd., and a portion of the plant of the Triangle Chemical Company, Ltd. Five firemen were overcome.

The fire started in the boiler room of the paper plant.

The paper plant officials place their loss at \$1,000,000, the greater part due to the destruction of a large supply of paper.

The chemical company officials place their loss at \$250,000.

**Mexican Air
Lines Planned**

MEXICO CITY, July 13. (AP)—A concession for establishment and operation of three air lines, connecting San Luis Potosi with Matamoros and Piedras Negras, United States-Mexico border towns, and Manzanillo, on the Pacific Coast, has been granted by the government to Edward Meade, Mexican citizen, who said he will have the lines in operation within two months.

THEATERS'
TRANSFER
REPORTED

Publix Interests Said
to Have Completed Deal
for Northwest Chain

MINNEAPOLIS, July 13. (AP)—The Tribune today says that sale of the Northwest chain of theaters operated by Finkelstein & Reuben Inc., is reported to have been completed at a price of \$10,000,000.

Although admitting that "the sale has been discussed," Finkelstein & Reuben officials declined to confirm or deny the report. Negotiations for the sale have been in progress for several months.

A chain of 140 theaters is under control of the F. & R. interests in cities throughout Minnesota, Wisconsin, North and South Dakota and Montana.

NEW YORK, July 13. (AP)—Officials of the Publix Theaters Corporation would make no statement today regarding their reported purchase of the Finkelstein & Reuben Northwest chain of theaters as announced by the Minneapolis Tribune.

BUTLER GETS
HIGHER RANK

(Continued from First Page)

volunteer second lieutenant during the Spanish-American war. He now commands the marines at Quantico, Va., which post he will retain.

Both promoted officers have long and distinguished records in action. Butler wears two Congressional medals and many decorations from foreign powers. He has taken part in virtually every marine expedition since the Spanish-American war.

Gen. Myers, who is president of the Marine Corps examining and retiring board, is 58 years of age. He was advanced twice for heroic conduct in battle. He took part in the Boxer uprising and during the World War served with the Atlantic Fleet.

BUTLER'S RECORD
Gen. Butler was promoted to captain for heroism in the Boxer campaign in China. Since then he has served in the Philippines, Cuba, Nicaragua, Honduras, Mexico, Haiti, Santo Domingo and again in China—where he commanded the latest marine expedition.

Not the least spectacular incident in his career was his command of the Philadelphia police force as director of public safety in 1925. He undertook "the clean up" of the city while on leave from the Marine Corps and was dismissed after he had declined a request by the Mayor that he be retained.

Gen. Butler is the youngest general in the Marine Corps.

**FARM BOARD
HAS OFFICE
IN HOSTELRY**

Temporary Headquarters
Ready in Famous Suite
Occupied by Hoover

WASHINGTON, July 13. (Exclusive)—The new Federal Farm Board will have its headquarters in the Hotel Mayflower. The offices will be thrown open Monday after the initial meeting of the board called by President Hoover at the White House. A suite of eleven rooms completely equipped with office furniture, telephones, filing cabinets, etc., was made available yesterday for the board by officials of the public buildings commission.

It is expected that the body will maintain the present headquarters, which are considered temporary, for about two months, or until other space is found in some government-owned building.

The farm board, which now becomes the "big news" of Washington with Congress adjourned, is to occupy the famous Suite 37 utilized by President Hoover before his inauguration to receive political callers.

**Hardinge Loses
New Trial Plea**

CHICAGO, July 13. (AP)—A motion for a new trial in the \$250,000 breach-of-promiss suit of Ann Livingston against Franklin Hardinge was overruled today. Attorneys for the 62-year-old manufacturer were allowed ninety days in which to file an appeal.

Miss Livingston, a Tulsa (Okla.) divorcee, won a \$250,000 judgment last week. She has since filed another suit for \$200,000 against Hardinge on slender charges.

President Approves Choice
of Selecting Body

WASHINGTON, July 13. (Exclusive)—The selection board of the Medical Corps, United States Navy, has recommended fifteen officers for promotion and the recommendations have been approved by the President.

The selection board, which convened on the 1st inst., was composed of the following officers of the Medical Corps: Rear-Admiral Robert M. Kennedy, M.C., U.S.N., president; members: Capt. T. W. Richards, Capt. C. C. Pryor, Capt. E. J. Grow, Capt. W. M. Garlon, Capt. P. S. Rostler, Capt. W. E. Angwin and Lieutenant-Commander G. H. Mankin, recorder.

The officers recommended for promotion to the grade of captain are:

CALIFORNIAN FIRST
Commander Paul Randolph Stalaker, recruiting station, Philadelphia; home, 233 1/2 Second avenue, Los Angeles, Cal.

Commander Abraham Herbert Allen, U.S.S. Mercy; home, 302 Fifth Road, Philadelphia.

Commander Montgomery Alexander Stuart, naval medical school, Washington, D. C.; home, 1800 Jefferson avenue, East Detroit, Mich.

Commander Herbert Lester Reiter, naval hospital, San Diego; home, 80 Pleasant street, Franklin, N. H.

Commander Harry Alfred Garrison, U.S.S. Nevada; home, 416 Elm street, Morgantown, W. Va.

Commander Henry Louis Dillard, U.S.S. Oklahoma; home, 686 Rosalia avenue, Oakland, Cal.

Commander Elmer Eaton Curtis, Naval Hospital, Mare Island, Cal.; Navy pay office, First National Bank Building, San Francisco.

Commander Charles W. O. Runyon, Naval Hospital, Washington, D. C.; home, Single Oak, North Stamford, Conn.

Commander Charles J. Holeman, U.S.S. Texas; home, 238 North Owen avenue, Lansdowne, Pa.

Commander Montgomery E. Higgins, Naval Hospital, Washington, D. C.; home, Boyds, Md.

ONE FROM ALABAMA
Commander George Warner Shepard, Naval Hospital, Mare Island, Cal.; home, 308 South Garfield street, Alhambra, Cal.

Commander Dallas Olinchard Sutton, Naval Air Station, Pensacola, Fla.; home, 218 Klinger Road, Washington, D. C.

Commander William Chambers, Bureau of Medicine and Surgery; home, Pleasantville, N. J.

Commander Kent Churchill Melhorn, Director, General Public Health Service, Health, Washington, D. C.; home, North Main street, Kenton, O.

Commander Joseph Albert Nieto, Marine Detachment, Peking, China; home, 448 South Sixty-third street, Philadelphia.

**Surgical Speed
Rescues Infant
Choked on Corn**

NEW HAVEN, July 13. (Exclusive)—Rushed here fifty miles by automobile with a kernel of field corn stuck in his wind pipe gradually choking him, a 9-month-old baby, Charles Hoyrab, is breathing freely today as a result of surgical skill and speed.

The child was blue in the face when the panic-stricken parents reached St. Raphael Hospital for their home at Sharon, Ct. Dr. Samuel Chino, an internist, performed an emergency operation at once, making an incision in the wind pipe through which he inserted a tube into the windpipe, permitting the child to breathe again.

The morning Dr. Charles Flynn performed a tracheotomy, removing the kernel.

**Moon Regulates
Oyster Spawning**
MILFORD HARBOR (Ct.) July 13. (AP)—The full moon of July and August is the "spawning moon" of oysters.

Such is the observation of H. F. Prythorpe of the Bureau of Fisheries.

The phenomenon is explained as being due to the tidal period of ebb and flood. The tide has a greater range during the period and the water is brought to a spawning temperature by heating on a larger area of tidal flats.

Japanese understand irrigation and melons. Also they have an uncanny ability to get work out of Mexicans. The trucking work is done exclusively by melons. Horses can't stand the heat.

AMAZING SPEED
Mexican pickers work with large canvas bags on their backs. They flip the melons in with a peculiar jerk of the wrist. They get 16 cents a crate. A good picker can gather fifty crates a day. The Japanese men get from \$250 to \$300 a month. Most of them are sending their children to the universities.

The picked melons are poured into pens in the large packing-houses. Most of the big melon farms are owned by the packing companies. The speed attained by the packers is amazing. One crew of experts stands all day making packing boxes. The lumber for these comes from Oregon—already cut in place. During the season about 50,000,000 feet of white pine goes into Imperial Valley fruit boxes. An expert can nail together 500 boxes in a day. He gives two whacks to each nail—one a sideways glancing whack to set the nail—one to drive it in. Highly trained young men were the melons in colored tissue paper and put them in the boxes. The

NO BARRIERS IN AID SERVICE
Cowperthwaite Clinic Open to All

Cowperthwaite Clinic Open to All

Waiting for Their Turn
Typical group of youngsters "waiting for next" at the Community Chest's Allen C. Cowperthwaite Clinic.

IN THE common cause of aiding humanity there should be no barriers of race or creed—and there are no such barriers at the Allen C. Cowperthwaite Clinic and Hospital, an agency of the Community Chest, located at 1510 North Main street.

This modest two-story brick building, in the heart of an industrial section, bears mute testimony to the purpose guiding every agency of the chest—a purpose of service which ministers to all in every conceivable affliction and need.

honey dew melons are packed in excelsior—more for the sake of appearance than for real necessity. The filled boxes are put on an escalator and rolled along to a "lifter" who tucks on the slats. He gets a cent a box and can lid 2500 in a day.

Just as the lifter seizes the box a boy computes the number of melons in the box. In one packing shed, this expert was a 15-year-old boy. He was so expert that he could tell the exact number of melons and stamp the box as it rolled by without stopping it.

One day ahead of time, the shipper notifies the railroad as to the number of cars he will need. These are waiting at the shed. To get them involves a terrific railroad problem. All passenger trains on entering this area have to feel their way along from one desert town to another. The switch engines have the right of way.

A refrigerator car costs \$3500. It has two ice compartments at the two ends. The two ice boxes have to be filled with 9000 pounds of broken-up ice.

They are ice before loaded; ice again after loading.

COLLEGE ICE MEN
The ice comes up on long endless chains to a high platform. Boys with ice prongs grab the ice off the escalator and shove it into the cars. This work is done almost entirely by college boys on vacation. Practically the whole Berkeley football team is shoveling ice in Imperial Valley. The work requires great physical strength and endurance. They often have to work eighteen hours at a stretch. They get 60 cents an hour.

The cars have to be ice again at Yuma and at El Paso and at various points throughout the East. The chill of the refrigerator car is a protection not only against the desert heat outside, but against the heat of the melons themselves. A melon picked early in the season has a heat of 85 per cent; at this season, they go into the cars steaming with a sun absorption of 120 per cent.

As soon as loaded, the fruit cars start for the East; and they go southward for election. Under their contracts, the railroad have to land these melons in New York in nine days—ready for sale on the tenth day.

The trains go to Yuma where they are made up into "blocks" or freight trains. These blocks are numbered. The experts of the Pacific Fruit Express (the fruit department of the Southern Pacific and Rock Island) know every car that goes into each block.

Some of the cars are sent directly to New York or Chicago. Others start to what are known to the railroad as "gateways." These are points like Omaha or Minneapolis. They are started for these points; but are diverted to the markets en route.

"TRAMP" CARS
For instance, a shipper starts a car for Philadelphia but finds that prices are better in Chicago or Kansas City. He notifies the railroad and the car is taken from the train and re-routed. Sometimes the destination of a car of melons will be changed ten times before it gets across the Mississippi River. These vagrant cars are known as "tramps."

The railroads have a very interesting method of keeping track of the exact location of each wandering car. There are something like 3000 at this minute rolling on their way to the East. Last Monday 303 melon cars arrived in New York.

Sometimes the loads of melons are bought before they leave Imperial Valley by buyers who get 25 cents a car for their services. More often they are consigned to "receivers" in the large cities.

This receiver gets 5 per cent of the value of the car load. The auctioneer gets 2 per cent.

Unlike the method of orange sales, the melons are placed on the Erie docks in New York piled up in tiers. The fruit buyers examine the tiers. The auction proceeds in a manner the reverse of the usual auction sale. The auctioneer—in- stead of beginning with a small bid and working up the price, begins at the top and goes down. This saves time. If they had to wait for the price to go up a cent at a time, the melons never would get sold.

The fruit is bought there not for New York alone. It is estimated that the fruit buyers of New York

ROBBER OF BANK
CAUGHT IN DASHBandit Runs in Blind Alley
and Starts FiringOfficer Braves Bullets and
Overpowers GunmanAll of \$1400 Taken from
Branch Recovered

Trapped when he darted into a blind alley in an attempt to elude Motorcycle Officer Body, a bank bandit was captured yesterday afternoon a few minutes after he had held up L. B. Brady, cashier and paying teller of the Citizens' National Trust and Savings branch bank at 1301 South Figueroa street, and fled with approximately \$1400.

A dozen or more persons were in the bank when the robber entered quietly and slid a note, scribbled on a pay roll check, across the paying teller's counter. As Brady was glancing at the message, the bandit hastily passed another note across the desk which read:

"You are covered by me and my pal. \$2500 quick. One wrong move and you are a dead man. No alarm for ten minutes. You will still be covered from outside with Maxim silencers."

Brady handed over \$1400, all the currency within his reach, and as the bandit started toward the door the paying teller snatched a revolver from the desk of B. P. Vogel and started in pursuit, shouting at the retreating figure of the robber as he ran. The pistol reports attracted the attention of Motorcycle Officer Body, who took up the chase, abandoning his machine

"We come into contact with people who need not only physical care, but who are beset with other problems common to the poor," said Rev. B. H. Pearson, in charge of the clinic. "It is part of our work to aid, in co-operation with other agencies, all problems that may arise. The color of a man's skin does not matter."

The Cowperthwaite Clinic, organized in 1922, last year handled 817 cases, with a total of 2813 visits. Seventeen doctors, under R. F. Knoll, chief of staff, volunteer their services.

buy for a population of between 15,000,000 and 20,000,000 persons. The steamers buy a lot.

The cars being emptied, are hurried back to California as fast as they can get there. In the height of the season, they do not go into the lonely desert sidings again. They are sent directly to Imperial Valley.

At this time the season is dragging toward the end. In the first week of August it will be over as far as the melons are concerned. Already they have begun to mobilize the fruit army for other sections. The Mexicans are packing up the Ford; putting the stools on the running boards. The railroads are piling up cars in other areas. The later melon fields of Arizona and the melon fields at Turlock—the Northern California grapes and later the apples. The college boys are getting ready to hang up the ice books and go back to the football field—so hard from the summer's work that you couldn't drive a nail into them. Pathologists are going into the laboratories to figure up the results of their annual light against the melon pests—their work in developing new melons—examining sugar content.

The battle field is being cleaned up for the next fight.

FIGHTERS ROUT
BRUSH FIRES

(Continued from First Page)

Inglewood successfully fought a brush fire in the Baldwin Hills which burned over more than 100 acres within an hour the fire was under control.

BRUSH FIRE IN NORTH BROUGHT UNDER CONTROL
O'NEALS (Cal.) July 13. (P)—A crew of about seventy-five men, recruited from Madera and from the North Fork ranger station and aided by the new fire truck of the State Forest Service for the counties of Madera, Fresno, Tulare, Kings and Kern, late last night brought under control the stubborn grass and stubble fire which broke out early yesterday on the Anlo ranch, six miles east of here in Mountain View, and burned approximately 3000 acres.

Former Mayor Cryer sailed for Honolulu yesterday aboard the Laseco flagship City of Los Angeles for his first real vacation in eight years. With him are Mrs. Cryer and their two children, Catherine and Edward.

"Politics are going to be absolutely taboo in the Cryer family for the next month, at least," he said. "We will spend a month in Hawaii and upon our return I will resume practice of law in Los Angeles. It is my ambition to set up a worthy foundation for my son, Edward, who will enter Pomona College this fall and study law with a view to entering his dad's office."

Mr. Cryer declined to comment on the future of Los Angeles city government.

SERVICES CONDUCTED FOR GERALD WINDSOR
Funeral rites were conducted at the Little Church of the Flowers yesterday for Gerald Pryce Windsor, superintendent of the Masonic Railroad in Mexico, whose body was brought here for burial in Forest Lawn Memorial Park. Mr. Windsor's home was at 2138 West Silver Lake Drive. He was 33 years of age. Besides his widow, he leaves a son, Gerald P. Windsor, Jr., and a daughter, Florence C. Windsor.

LEVY MAPS SUBMITTED
The City Engineer has transmitted to the Council the assessment district maps for the improvement of the Park-avenue and Glendale Boulevard district, the improvement of Pico Boulevard between Crenshaw and Robertson boulevards, and the improvement of the Anacostia and Ninety-fifth-street district. All were referred to the Public Works Committee.

YOUNG CUDAHY ARRAIGNED

Preliminary Hearing Set for the 19th Inst. On
Charge of Driving Car While Drunk

Michael J. Cudahy, Jr., 21 years of age, an heir to the Cudahy meat-packer fortune, was arraigned before Municipal Judge Ballard yesterday a few minutes after the complaint had been issued by Dep. Dist. Atty. Frampton on a charge of driving an automobile while intoxicated.

Judge Ballard set young Cudahy's preliminary hearing for the 19th inst. at 2 p.m. After the arraignment the youth provided the required \$1500 bond through his attorney, Edward L. Davin.

Young Cudahy was arrested at 1 a.m. Friday after his automobile had collided with one driven by Charles B. Lang of 5102 Delaware avenue, Eagle Rock. The accident occurred at Argyle and Franklin avenues. Investigating Officers Martin and Kahler of the Hollywood division were on duty when the bandit began darting in and out of doorways.

After an exciting chase of nearly a block along Figueroa street, the bandit turned and ran into a courtyard used by the Howard Automobile Company for washing cars. When he realized he was cornered, the fugitive turned and began firing at the officer. Body rushed at him and knocked the gun from his grasp with the butt of his own weapon and put him under arrest.

At Central Police Station the bandit gave his name as Jack Smith, 40 years of age, of 1233 West Sixth street.

IMPROVEMENT REFERRED
A petition requesting the improvement of East One Hundred and Sixteenth Place between San Pedro and Main streets has been referred by the Council to the City Engineer and Public Works Committee.

Mr. Strom was born in Sweden in 1884, and came to America in 1902. He lived in Chicago until 1911, and from that time till his death last Thursday, in Los Angeles. He was 45 years of age. He leaves his widow, Mrs. Alma Strom, and two sons, Kenneth and Robert, who live at 836 South Norton avenue.

STROM FUNERAL TO BE MONDAY
The funeral services for Samuel Strom, for many years vice-president of the Pacific Ball-Bearing Company, will be conducted Monday at 2 p.m. from the W. A. Brown funeral parlors, 1815 South Flower street. Burial will follow in Inglewood Park Cemetery.

Mr. Strom was born in Sweden in 1884, and came to America in 1902. He lived in Chicago until 1911, and from that time till his death last Thursday, in Los Angeles. He was 45 years of age. He leaves his widow, Mrs. Alma Strom, and two sons, Kenneth and Robert, who live at 836 South Norton avenue.

School Asked
for Children
at Dam SiteTo avoid transportation of children
of San Gabriel dam workers
and down the canyon to the
district school in Glendora, the
Board of Supervisors yesterday
was asked to provide a building and
grounds on the dam site.

If county authorities will provide facilities the Glendora district will provide teachers, according to a letter to the board from Julius Jorgensen of the Glendora Chamber of Commerce.

When a full force of workmen is employed at the dam it is estimated that about 3000 persons will live there. There now are thirty children living at the dam.

Contracts awarded during the past week by the Board of Public Works totaled \$240,687.05, according to a report submitted yesterday by City Engineer Shaw. The largest job is that in the Bedford-street and Adams Boulevard improvement district, \$159,612.34. The work includes grading, 561,000 square feet of paving, gutters, storm drain and water system.

The other contracts are for the improvement of the south roadway of Burton Way between La Cienega Boulevard and Robertson Boulevard, the improvement of One Hundred and Tenth street between Broadway and Figueroa street, and an alley.

GREEN GRID TUBE OPENS NEW RADIO POSSIBILITIES

Development Seen as Most Outstanding Forward Step in Industry Today

By Dr. Ralph L. Power

The green-grid tube has taken the radio public by storm. It is talking about it and yet few know what it is all about. The "Jubilee" dealer, it is to be a panacea that will cure all the ills, anticipate a balance of national unity for the event.

PATENTS IN RADIO HOLD SPOTLIGHT

Recent Court Decisions Act as Warning to Many Makers of Sets

The value of patents, based on fundamental radio principles, is becoming more important every day in the radio-set manufacturing industry. A few years ago many large and small manufacturers went ahead with the production of their sets without due regard to ownership of patents, which then were in a more or less unsettled and muddled state. Many important cases have been decided recently by the courts, which have thrown out a note of warning to the manufacturer who hitherto freely used any radio construction he desired without license.

NEW RECEIVER SHOWING FIXED

Victor Product to be Placed on View Tomorrow

The advent of Victor into the radio field with the new Victor radio and Victor radio-electro combination instrument ranks as one of the most important and significant events since broadcast began, in the opinion of many in the radio-music industry.

WOOD SEEKS BANK LEASE ABROGATION

Superintendent Asserts Deal May Aid Depositors of Pan American

Will C. Wood, State Superintendent of Banks, who has assumed charge of the affairs of the Pan American Bank of California, left yesterday for Sacramento to return Wednesday or Thursday.

Refrigerator Gas Explosion Burns Three

Fumes of ammonia gas from a refrigerating system which was being installed at the home of Mrs. Thelma Doyle, 37 years of age, 1814 South Curson street, yesterday caused an explosion in which three persons were severely burned. The victims are Mrs. Doyle, her 7-year-old daughter, Ora, and Ralph B. Stevens, 30, employed by the installing company. All three received first, second and third-degree burns about the face, shoulders, hands and legs.

Bobbing of Hair Held Brain Aid

Woman's recently acquired position in the political and business world rests largely on her knowledge of health measures and her freedom from restrictions of the Victorian age, was the statement yesterday of Dr. Paul E. Stretch, chairman of the Regional Progressive Chiropractic Association convention, to be held here August 12 to 14, next.

ORDINANCE ADOPTED

The ordinance of intention for the improvement of Orlando avenue between Reservoir avenue and Beverly Boulevard has been adopted by the Council.

**SIX DECADES SEE VAST
TRANSPORTATION STRIDE**

Strong opposition to the proposed Federal increase in tariff on lean fruits and vegetables is being voiced in Southern California, as revealed yesterday by Charles B. Hamilton, manager of the Alexandria, Va., representative of the hotel industry in Southern California. Washington, D. C., today is holding a conference to discuss plans for combating the proposed tariff increase.

"There was much discussion in Washington during the last session of Congress of a proposal to increase the tariff on all citrus fruits brought into this country from Mexico," Hamilton said.

In this page appears an article by John Stetson McCreary, travel agent and author of the Mission Plan, giving an account of his trip across the continent in one of the first airplanes to offer a regular cross-country passenger service utilizing both planes and trains.

Below is a verbatim account from the files of the Chicago Tribune of May 11, 1920, almost exactly sixty years ago, of the opening of the rails of the Union Pacific and Central Pacific Railroads at Promontory Point, Utah, and the subsequent passage of the first west-bound train on to San Francisco, thereby for the first time spanning the continent by steam train. This juncture occurred on May 10, 1860, and the first westbound train reached San Francisco May 12, after a journey across the continent which took nearly two weeks because of various delays incident to the celebration and to the slow rate of travel.

The place-train combination which brought Mr. McCreary from New York to Los Angeles required two days to make the

What Sixty Years Have Done for Transportation

The top is a photograph of the first train to cross the continent, arriving in San Francisco May 12, 1869. Note the prairie schooners which carried part of the interested crowds to witness the joining of the Central Pacific-Union Pacific rails at Promontory Point, Utah, where this picture was taken. In the center is a close-up of the engine, the locomotive which pulled the first transcontinental train showing a group of its passengers bound for California as settlers. Below is the City of Washington, the first transcontinental airplane in regular passenger service to reach Los Angeles as part of the new plane system of the Transcontinental Air Transport. Col. Charles Lindbergh, who piloted the plane here, may be seen next to the ship a little to the right of center, his profile to the camera.

Three of the racing letters entered in the Los Angeles Times "round-the-world air-mail derby have covered a third of their scheduled distance circling the globe and left Berlin on their various routes yesterday.

Los Angeles for Salt Lake City Chicago at 7:35 a.m. the next day. From Chicago, it was en route to Miami and down across the Gulf of Mexico, arriving in Manzanillo the 3rd inst. Orozco, the friend, sent his answer over same route. It reached Los Angeles at 10:30 a.m. The arrangements for the flight to the various foreign countries had been completed. This delay held over the letters three days. In fact therefore, the eastbound letters reached Berlin after only thirteen days' elapsed time, using regularly established air-mail routes in this country depending upon which vessel brings them.

Letter No. 6 has a similar route through Moscow, and Irkutsk but will break its journey to drop down to Harbin in Manchuria, on to Dairen and Yokohama by the Japanese.

"It was my first venture in the air and I felt like a regular flyer after I had been up thirty minutes. The plane made the trip in four hours and it was the most comfortable I have ever experienced."

**AKER TO LECTURE
ON CHINESE ART**

University Club of Los Angeles announced Dr. William B. F. Ives, head of a Peking school of

DUE IN MOSCOW

Tonight two of the letters probably will have reached Moscow and will be on their way. Letters 5 and 6 have been scheduled to go north over Soviet Russia and down to the Sea of Japan by air mail. No. 5 has been sent along the Moscow-

Northern Chinese province.

Perhaps No. 6 will only have a career of storm and grief laid before it. It may be confiscated by one of the warring factions, but if it should come through with flying colors, not only will it have flown over the storms of wind and snow

number of times, but not during the last two years. Now that I've discovered aviation, I think I'll drop out here real often.

"I'm coming out to a bankers' convention in September and right now I am going to book passage. I will catch some nice tropical islands."

LIGHT SYSTEM ORDERED

Instructions have been given by the committee in charge of the lighting system to the firm which has been selected to install the same.

BY JOHN STEVEN McGROARTY

With eight fellow-passengers I left New York City last Monday at 8 p.m., traveling two nights by rail and two days by air, arriving in Los Angeles the following Wednesday before 5:30 p.m.

We had crossed the North American continent, from ocean to ocean, in forty-eight hours.

We journeyed on the second day of the regular schedule of the Transcontinental Air Transport operated in conjunction with the Pennsylvania and Santa Fe Railway systems.

A NEW STORY

It is in such mood that I feel impelled to write the story. Sure, even to people whose minds are not so much as yours, it is a wonder of anything, it is a narrative that should prove interesting. Certainly, it is not an old story. It is a thing that never was done until now.

We are to remember, too, that only an infinitesimal percentage of the world's population has, as yet, traveled by air. It is a new idea, a new concept, adjusted to even the idea. Folks still shrug their shoulders at the suggestion of it. People are still timid about "taking the air."

And so man was ever more timid day before, leaving the country across which we traveled green and lovely before the power of all words to tell.

When we landed for the night in Oklahoma no one was weary. We were happy and willing to continue on had that been the schedule.

The second day out from the great East, however, is to my mind far the greatest.

FAGAN GRANDEUR

It is during this second day's flight that one leaves behind the soft pastoral beauty of the East and Middle West and comes upon the sublime pagan grandeur of the West.

It is the sight of the checked farnes, now memories in the wing presence

ford trimotor ship was nearly fifty feet in length with a wing span of 100 feet. But that it was equipped with three nine-cylinder air-cooled motors of 430 horsepower each. But, knowing nothing whatever about mechanics, the passengers gave me not the slightest comfort.

My courage arrived from another and a better source. I caught sight of the two cowboys who were the two broad-shouldered American boys. Two of the thirty-six, just like them, who were hand-picked by Anderson himself for this work of the great year of acenting.

The boys smiled down upon me from the cockpit and waved their hands. And then I went aboard and found the rest of the crew.

The other passengers were in a state of elation. A couple of good gulps, and I was once more as good as dead. But I was not. I was not. Rogers set himself up to be.

The greatest thrill of all was when we crossed the San Bernardino range. The boys had looked to their little-capped summits from the green valleys below. And now I looked not up to them but down upon them. High as they are, the peaks of the range are not, have hung a pebble from the sky as to their serrated heads. Like Bear Lake and Arrowhead Lake some of the high peaks are as flat as the plain below us.

"It won't be long now," some one

than nine hours between Columbus, O., and Wayne, Okla. We thought the entire trip would take two hours. But when we reached Missouri in two hours and Illinois, Missouri and Kansas were left behind and we were in Oklahoma.

Now, just from the windows of the ship's cabin, the flight did not seem to be rapid. The beautiful earth beneath us with its wide stretching prairie, its fields and forests lingered in view, and yet the plane was never making a less speed than 110 miles an hour.

It was fortunate for me and other novices that we flew comparatively low until along toward the middle of the afternoon. The

Now that it is all passed and gone and I have had a little time to think it over, I have come to the conclusion that travel by air is not the worst thing that has happened since I was created. I am glad, about it, but I am glad that I have had a fling at it. And the next time I have to go up it won't worry me.

The great and important phase of it, however, is that the Atlantic seaboard and the Pacific Coast are now only forty-eight hours apart.

FLYING HIGH

It appears that as we took off from the Kansas City Airport, the pilot had received a message to fly high. And they did. I think I saw a person in the sky who must be the nerve to look at the altimeter to see just how high we were, my solar plexus advised me. It was high enough to suit anyone, and I saw a soft rock drop from the earth from the cabin window.

The Goodan-Jenkins Furniture Company, 724-726 The South Broadway, announced yesterday the purchase of the entire stock of the Riedsco Furniture Company, one of the leading furniture stores in San Diego. The stock has been moved to the Goodan-Jenkins store where it will be on sale tomorrow.

The purchase includes Karpen and Kroeher living-room furniture, Berkeley & Gay and Karpen furniture for dining-room and bedroom, A. G. Rosenblyum's drapery collection, George Mitten's cabinet, etc.
